Short description of the underlying problems that the commitments are aimed at	
Description of commitments (if more than one please list, please try to define clear, realistic and measurable goals for each commitment)	
1. To promote the Norwegian standard of palliation and have it implemented	
2. To establish palliative medicine as its own disipline with a foundation in different specialities	
3. Improve the education of medical students in the field of palliation	
Goal, measurement of success and time (please list at least one outcome measurement for each commitment)	
1. Ongoing. Will be finally implemented in 2008	
2. The process has started, and will continue during the next 5 years	
3. The medical students in Trondheim have evaluated the education in oncology and palliation to be very good. They have both lectures, problem based learning (PBL) groups and weakly bedside education involving patients. We will try to implement this model also for the medical education in Bergen, Oslo and Tromsø.
